

Lukas cable cutting machine LSI 220

Hydraulic cable cutting machine can be used for the mobile use in cable recycling companies. The type LSI 220 is suitable for the processing of heavy cables. Because of its very good shear force you can save much time. Because of its low weight, it is very simple to handle with. It is easy to use because of the Lukas Star Grip valve. The cutting blades can be resharpened. This insures a long life-time.

- pressure: 50 MPa
- cutting force: 270 kN
- width of mouth: bis 125 mm
- dimension (LxWxH): 680 x 190 x 163 mm
- weight: 13,8 kg

Matching hydraulic power pack pump

Surely you can find in the program of Lukas different motor-driven pumps for the drive of the hydraulic shears. Specially for the cable cutting machine the strong two stage pump PO6-LSI-10-50 is developed. This combination guaranties an optimum efficiency and operational safety..

- pressure: 50 MPa
- oil tank: 9 litres
- Output: low pressure 4,4 l/min; high pressure 1,4 l/min
- capacity: 1,5 kW with 3000 min-1 / 230 V
- dimension (LxWxH): 372 x 312 x 431 mm
- weight: 43,5 kg

Can delivery **with petrol engine.**
